QuickShortcutMaker 2.4.0 APK This app can link to an application from the list of activities that are installed on your phone. Even if there are so many applications installed, you can choose an activity smoothly. You can also use The QuickShortcutMaker to search in the app, to start. If you want to use the app that you don't use frequently, you may not have shortcuts for it. You may need to browse the app from a list of many apps. Even if you know the name of the app, it's hard to find it. In this situation, theQuickShortcutMaker will help you find the app. Please try it! This can be useful. But please use it at your own risk! You can create shortcuts to hidden settings screens that are normally inaccessible. Even if you have encountered any issues with this app or shortcuts created by this app, I have no responsibility for it. Please make sure to use this app at your own risk. Internet Access Permission Information: To improve the app faster, version 2.0.1 will ask you for additional permission to access the network so that the app can send a detailed bug report to the developer. The app uses network only error reports. And when it communicates, a confirmation message is displayed, so be sure. For Launcher3 of Cyanogenmod If you can't create a shortcut, please try the following steps: 1.Long-tap the home screen. 2. Tap WIDGETS. 3. Long-tapactivities that have the QuickShortcutMaker icon. 4. Drag it on to somewhere on the screen. 5. QuickShortcutMaker starts. 6.Select an activity, edit it, and tap Create. 7. A shortcut is created on the home screen.
